

Mid Span Tool - Longitudinal Buffer Tube Slitter

Description

Buffer Tube Slitter is especially designed for stripping the outer jacket of a patchcord or a pigtail. It can slit loose tubes of C 1.5mm-3.3mm longitudinally. It has 4 rails on the body. Each rail is for the tube of specified diameter so that the stripping precision can be improved.

Features

- Compact design, light weight, very portable
- 4 guide rails for tubes with different diameter
- Composed with high quality metal blade, more durable
- High precision rail design, ensure the integrity of the fiber.

Specification

Dimension (mm)	52*38*22
Weight (kg)	0.03
Body Material	Stainless steel
Stripping cycles	2*1000 cycles
Guide rail diameter(mm)	For y1.5-1.9 For cp2.0-2.4 For cp2.5-2.9 For p3.0-3.3

Mid Span Tool - Longitudinal Buffer Tube Slitter

Description

TTGO3 Buffer Tube Slitter applies open structure and five different sizes of guide slots and ten sharp blades.

It can slit loose tubes of cp4.5mm- y11mm longitudinally.

Features

- Compact design, light weight, portable
- 5 guide rails for tubes with different diameter
- Composed with high quality metal blade, more durable
- High precision rail design, ensure the integrity of the fiber.

Specification

Guide rail diameter(mm)	p4.5	p6.0	p7.0	p8.0	cp11.0
